**Report Overview**: This publication on the Status of Women in Scott County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties*, 2004. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

### The Status of Women in Tennessee Counties SCOTT

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nation-wide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

#### **Employment and Earnings**

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ♦ Women in Scott County have a median annual earnings of \$19,451 compared to the median earnings of their male counterparts which is \$24,721.
- ♦ Women in Scott County make up 42.5% of the labor force.
- ♦ The unemployment rate for women in the county is 9.1%, significantly higher than the rate for all Tennesseans (5.5%) and for all county residents (7.3%).
- Among all working individuals in Scott County, 21.0% work in managerial or professional occupations, but when only female workers are considered, that number increases significantly to 34.2%.

#### **Economic Autonomy**

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- Scott County ranks in the bottom half of counties in every indicator for the economic autonomy of women in the state of Tennessee.
- Only 59.8% of women in the county have a high school diploma or the equivalent; it is a percentage unlikely to change because the current female high school dropout rate is pushing 15 percent.
- 9.5% of women in the county have a four-year college degree or better, a percentage still higher than that for all county residents (7.5%). However, 19.6% of all Tennesseans have a four-year degree or better.
- ♦ Women-owned businesses only make up about 11 percent of the privately owned businesses in Scott County, but women-owned companies only account for 4.6% of the total sales and receipts of private firms in the county.
- ♦ Almost one-fourth of female workers earn wages below the poverty level.
- ♦ 17.6.% of families in the county live below the poverty level but 34.6% of families with a female house-holder and no husband present are in poverty.

### ABOUT THE COUNCIL AND THIS REPORT

Scott County

The Status of Women in Tennessee Counties report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.

Co-Authors: Jennifer Rawls, Executive Director, Julia Reynolds, Research Analyst, and Lee Eubanks, Intern
